

SKY WATCH FOR MAY

NEEL ROBERTS
Sky's the Limit

On Saturday, May 13, look southeast before dawn as Saturn and the moon rise into the morning.

On Thursday, May 18, look northeast-east before dawn, at around 5 a.m., as a thin crescent moon and Mercury rise into the morning.

On Wednesday, May 24, look southwest-west at dusk as a crescent moon, Mars, Venus and Pollux, the brightest star in the zodiacal constellation Gemini, all set into the night sky.

Go to the “news” section of in-the-sky.org for more details about these celestial events.

PUBLIC EVENTS
