

# Sky watch for June

**NEEL ROBERTS**  
*Sky's the Limit*

On Wednesday, June 21 after sundown, watch as a crescent moon together with Mars and Venus are up all until after midnight.

Wednesday, June 21 is officially the summer solstice. We will have 16 hours and 22 minutes of actual daylight. The sun officially rises at 5:20 a.m. and sets at 9:42 p.m. with high noon at 1:31 p.m.

The Bootid meteor shower takes place on Tuesday, June 27. Look northeast-east after dusk as Comet 7P/Pons-Winnecke, the source, shoots about

10 meteors per hour.

## ***PUBLIC EVENTS***
