

# Stanford professor with CIA ties confirms aliens 100% here

By Neel Roberts

There's a lot of buzz about UFO's and aliens these days and it's not coming from the independents anymore. In fact, if you type "UFO" into Google, it retrieves a plethora of sites, etc. compared to even a year ago. Popular Mechanics, owned by Hurst Publications recently published an article "This Stanford Professor With CIA Ties Says Aliens Are 100% Already Here" <https://www.popular-mechanics.com/military/weapons/a43978705/stanford-professor-says-aliens-are-already-here>. Considering ufologists were deemed conspiracy theorists since people can remember; it's a stunning change of heart and even encouraging. Professor Garry Nolan of the Department of Pathology at Stanford University School of Medicine who has ties to the CIA has claimed that aliens have not only visited Earth but that they have been here for decades and continue to be here at a recent SALT iConnections in New York <https://www.youtube.com/watch?v=e2DqOw6Uy4>.

Nolan believes aliens species are surveilling the Earth using drones with advanced expertise. He stated that physicists at defense corporations Nolan coordinated with shared data about these unconventional technologies the government recovered and attempted to reverse engineer them. Nolan emphasises the need for Congress to create a whistleblower program allowing people from within the government and other bodies working on this matter to speak up and share their understandings. Similarly, John DeSouza <https://www.johntamabooks.com>, a former FBI special agent is called the "real Fox Mulder" given he did in fact work on the

X-Files when he was with the bureau. After 25 years, he retired from the government and went whistleblower. Since then, he's written several books and has been sought after for interviews on all he saw in the high classified files. In a recent interview with Clay Morris of Redacted News <https://www.youtube.com/watch?v=EUe1vbJ3Yno>, he confirmed much of what Professor Nolan disclosed publicly with more. 2023 is turning out to be the year of the whistleblower and while legislation to protect them is a good idea, I don't think people will wait. Congress has an approval rating of 7% and the mainstream media is about the same, so potential whistleblowers must take their case directly to the people via social media, etc. Tucker Carlson did his first Twitter show back in June and it got over 70,000,000 in one day compared to his 3,000,000 on his former Fox nightly show, so the path is obvious. The late Jordan Maxwell <https://www.jordanmaxwell.com/bio.html> speaker, author and earlier pioneer in the truth movement lived by a saying "nothing in this world works the way you think it does" is about to prove itself. "The Best is Yet to Come"!

**Sky watch for the next month:** Download this month's sky free schedule at <https://in-the-sky.org/newscal.php?month=8&year=2023&maxdiff=7#dateset> and charts <https://in-the-sky.org/skymap2.php>, <https://www.heavens-above.com/SkyChart.aspx>, <http://whatsouttonight.com/Resources/202308augWOTSky.pdf>.  
**EDITOR'S NOTE:** Congress lawmaker held a hearing July 26 to examine how the executive branch handles reports of UFOs or UAPs. Discussion was held on government

transparency. Please see: <https://www.youtube.com/watch?v=SNgoulAcyDM>

1. Mars and Moon close- Friday, August 18th before sunset look SWW and watch this duo set into the night after 21:00. [https://in-the-sky.org/news.php?id=20230818\\_20\\_101](https://in-the-sky.org/news.php?id=20230818_20_101).
2. Saturn "DAY" Observing- Saturday, August 26th before sunset look SWW if you have a good scope, you can see the rings of Saturn in daylight which is a treat after 06:38 before it sets at 06:42.
3. Milky Way Brilliance- This is an excellent month to view our home galaxy without freezing. Best time is after 11:00 pm until dawn <https://www.aimanac.com/night-sky-map-august-persid-meteors-milky-way>.
4. Annual Perseids Meteor Shower- Sunday August 13th after dark will be the peak of the summer meteor shower with estimated rate of 144 meteors per hour however the Moon, in Aquarius, will be only 2 days past full phase at the shower's peak presenting significant interference throughout the night. Best view is starting at 11:00 pm facing the NNE in the constellation of

Perseids until dawn. Check out this viewing guide for details [https://in-the-sky.org/news.php?id=20230813\\_10\\_100](https://in-the-sky.org/news.php?id=20230813_10_100).

For This Month's Events Check the Calendar- <https://calgary.rasc.ca/calendar2023.htm#Aug> and YouTuber Late Night Astronomy <https://www.youtube.com/@LateNightAstronomy/videos>

Saskatchewan Summer Star Party Weekend 2023- Mark down Wednesday August 16 to Sunday August 20, 2023. Cypress Hills Interprovincial Park Centre Block, 30 kms South of Maple Creek on Highway 21 presented by the Saskatoon and Regina Centres of the Royal Astronomical Society of Canada. For further details contact Les Dickson at 306-270-9194, [sssp.sk@sasktel.net](mailto:sssp.sk@sasktel.net), <https://sssp.saskatoon.rasc.ca>.

**Happy meteor shower hunting and keep reaching for the Sky!**
