

The Artemis Accords; Man's Contract Forward for Commerce in Space

By **NEEL ROBERTS**

Are there big doings in space? Just how ahead are we technologically unbeknownst to the public? Introducing the 1 year old Artemis Accords <https://www.nasa.gov/specials/artemis-accords/index.html>, one of the many programs of the US Space Force <https://www.spaceforce.mil>. An evolution of the 1967 Outer Space Treaty <https://outerspacetreaty.org>, it's the agreement on "Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies." At the moment, 13 countries including Canada are signed on and a recent Space News article <https://space-news.com/space-force-talent-strategy-is-a-departure-from-the-norm/>?fbclid=IwAR1KBQe3490gX4G5fEujjPZq_A-eVgN-vUvOzjMcnEhGRHAK_xiOGUUXwFM points out that job recruiting for the heavens is not just going to be for soldiers or astronauts but will be more on a civilian level like building a business, community, etc.

According to Live Science, there are plans to develop jumbo satellites for humans to colonize space <https://www.livescience.com/megasatellite-colony-ceres-oneill-cylinder.html>. A report by NASA proposes building a

mega-outpost of civilizations around the dwarf planet, Ceres, where people could move to this floating asteroid belt society in the next 15 years. One of the most dedicated persons to study this trend is Dr. Michael E. Salla <https://exopolitics.org/about/founder/>, creator of <https://exopolitics.org>, the political study of the key actors, institutions and processes associated with extraterrestrial life. The website is a plethora of information on this subject and his YouTube channel <https://www.youtube.com/michaelsalla> has weekly updates which I recommend.

His recent article "Are Secret Moon Construction Projects causing Worldwide Labor Shortage?" <https://exopolitics.org/are-secret-moon-construction-projects-causing-a-worldwide-labor-shortage/> is timely with all the job upsets happening here on Earth. The globe seems to be in a very big devolution as many are leaving their employment for refusing the vaccine. Is it all part of a massive plan? I think we'll find out sooner than later. While many will not agree with Dr. Salla's consultation of mediums for some of his insights, his triangulation of all the other developments have been well confirmed for many decades now, so Dr. Salla's worth following. Are we on the fringe of

the biggest leap for humanity? Looking back, the 1980's was the pre-computer decade, 1990's pre-internet decade, 2000's the pre-social media decade, 2010's the pre-Space Force decade and this, the most exciting, will be this one with the pre-galactic decade where it's about to get real. The death of globalism is being replaced by patriotism around the world at a record rate, so our golden age is the rising phoenix from the demise of deep state ashes. The Best is Yet to Come!

Sky watch for the next month: Download this month's sky free chart at <http://whatsouttonight.com/Resources/2021NovSkyWOT.pdf>

1. Southern Taurids Meteor Shower Peaks- Friday, November 05th after dark forecast is 5 meteors per hour until the wee morning hours of the 05th, and the new Moon assure dark skies for the show.
2. Northern Taurids Meteor Shower Peaks- Thursday, November 11th after dark forecast is 5 meteors per hour until the dawn of the 12th and the ¼ crescent moon sets around midnight for great views overnight.
3. Leonid Meteor Shower Peaks- Wednesday,

November 17th before dawn look towards the constellation of Leo. Originating from the comet 55P/Tempel-Tuttle, it should produce meteors at the rate of 10-15 per hour but the full Moon will reduce visibility.

4. Partial Lunar Eclipse- Thursday, November 18th beginning at 11:02 pm peaking at 02:02 am and finishing at 05:03 am.

Happy Cooler days and Meteor Watching!
